Benefits of Compost

- Helps retain moisture to reduce watering
- Controls erosion
- Suppresses weed growth
- Makes garden more attractive when used as a cover
- Beneficial nutrients in mulch improve soil

How to Collect Food Waste at Home

1. **Collect-** Begin collecting food waste separate from your trash and recycling, including fruits, vegetables, meats, seafood, bread, dairy, eggshells, coffee, plate scrapings, peels, rinds, and food soiled paper such as napkins and coffee filters.
2. **Add & Secure-** Collect food waste & food soiled paper in its own separate plastic bag. Store it in a convenient place, such as on your counter top, in your refrigerator or under your sink. Secure plastic bag by tying it off. Remember bags do not have to be compostable or biodegradable. They can be any color. We encourage you to re-use bags you may already have such as bread bags and produce bags.
3. **Discard-** Place your bagged food waste & food soiled paper into your green barrel, along with your green waste. Continue using your green waste barrel as usual. Remember, food waste no longer belongs in your trash barrel.

Can't Stand the Smell?

Below are some tips to help you reduce barrel odors:

- Place your green barrels on your lawn and rinse with soap and water to prevent any foods from sticking to the inside.
- Place food waste in a plastic bag before disposing in green organics barrel.
- Place your trash in a plastic garbage bag and make sure that it's securely tied before placing into barrels.

Good barrel hygiene is the secret to maintaining an odor-free barrel and an easy way to keep away unwanted insects.
