Tips for Living With Bears

Bears are attracted to anything smelly or edible, especially garbage. Bears are also attracted to beehives, orchards and gardens. Consider these tips to help make your home “bearproof”:

- Deodorize garbage container with bleach or ammonia.
- Separate food waste by keeping it in an airtight container. Use a garbage disposal whenever possible. Freeze meat bones or other smelly items until pick-up day.
- Be sure to keep barbecue grills clean.
- Pick up fallen tree fruit, and put away food sources at night, such as pet food and bird feeders.
- Close windows at night on accessible ground floors and decks.
- Don't leave food in or near a windowsill or on a counter near an open window.
- Securely block access to potential hibernation sites, such as crawl spaces under decks or buildings.

Bring your source separated green waste to any of our drop-off sites!
