#### Sustainability Update

**The California Senate** passed a bill to **improve air quality and reduce greenhouse gas emissions**. **CalRecycle** reports that landfilled organic waste (including green waste and food waste) decomposes in landfills and generates greenhouse gases contributing to global climate change. Residences and commercial businesses in your area are within a census tract that has been granted a Senate Bill 1383 low population waiver and therefore there will be no change to your current service.

SCAN TO LEARN MORE

Senate Bill 1383 requires a **75% reduction in organic waste disposal statewide by 2025**.

#### What Can You Do to Help Reduce Greenhouse Gas Emissions?

Tips and tricks to help prevent creating green waste and food waste:

- Grasscycling- learn more at [CalRecycle.ca.gov/Organics/GrassCycling](http://CalRecycle.ca.gov/Organics/GrassCycling)
- Food Waste prevention tips- learn more at [savethefood.com](http://savethefood.com)

Additional steps you can take to manage your green waste and food waste:

- Taking green waste and food waste to nearby community composting sites
- At-home composting. Did you know that the San Bernardino County Solid Waste Management Division (SWMD) sells backyard compost bins at their office in San Bernardino at a reduced rate to unincorporated County residents? Contact the SWMD Main line at (909) 386-8701 for more information.

#### Top 5 Items to Keep **OUT** of Your Recycling Cart

Here are the 5 top items that should never be placed in your recycling cart:

1. **No Garden Hoses**. Despite being made from rubber, vinyl or a combination of both, this item still belongs in the garbage container.
2. **No Diapers**. Diapers should be placed in your garbage container.
3. **No Hazardous Waste**. This means no paint, motor oil, batteries, syringes, needles, etc. Hazardous Waste puts our trucks and facility at risk and should not be placed in your garbage cart either. Visit <https://sbcfire.org/collectionfacilities/> to locate your nearest hazardous waste collection center.
4. **No Pet Food Bags**. The wax coating prevents the bags from breaking down in the recycling process, so pet food bags go into the garbage container.
5. **No Electronic Waste**. These items are best recycled through bulky item drop-off or a collection event.
